NOTE.—The two tables above (and other similar tables), must be read with some caution on account of changes of classification that were made before 1910, and at the end of 1930. From 1910 to 1930 the classification was substantially uniform. These tables are not affected by changes in classification made at the end of 1939.

Deaths in Public Hospitals (excepting the St. John's Park and the Tasmanian Sanatorium, which are in the Hobart District; the Home for Invalids, Launceston; and the Lachlan Park Hospital at New Norfolk), have been referred to the district in which the case originated. Deaths at sea are not included.

† Prior to 1940 includes Apoplexy.

* Deaths occurring at sea, or on foreign ships in Tasmanian waters, which were registered in Tasmania, are not included.

† Croup has been included with diphtheria since 1913.

§ Including, until 1939, cerebral apoplexy and arteriosclerosis in association with cerebro-vascular lesion.

‡ These results are the arithmetic means of the rates for each of the five years.

METEOROLOGY.

SYNOPSIS OF THE WEATHER OVER TASMANIA FOR YEAR 1940.

Rainfall.—Except in parts of the West and Central Plateau, and a few scattered places elsewhere, rainfall was generally below average. It was the driest year on record at the following representative stations:—Smithton, Irish Town, Oatlands, Eddystone Point, Gould's Country, Lewis Hill, and Tasman Is. Deficiencies ranged from 35 per cent to nearly 40 per cent in the East and Midlands, and from about 20 per cent to 25 per cent in the North, South, and Derwent Valley. Aggregates for the West and Central Plateau, however, were very close to normal. Hobart registered 1717 points, which was 691 points below the average for 97 years. Record high monthly totals occurred in February in the West and in parts of the Derwent Valley and Huon; also in November on Flinders Is. Record low amounts were reported in June around Colebrook (South-East Division); in August at many places in the South-East quarter and at a few scattered places elsewhere; and in October throughout most of the Midlands and East and at a few stations in the North.

Mean Monthly Temperatures were below average throughout the first half of the year, with the exception of March. Over-average conditions predominated during the latter half, but November was cool. Record low mean temperatures were established in February, and record high mean temperatures in March and August. At Hobart the highest temperature recorded was 99·1 degrees on 13th March, and the lowest 32·1 degrees on 4th September.

Crops, Pastures, &c.—Ample rains over most of the State in January provided a promising start for 1940 for crops, pastures, and stock, but an exceptionally cool February, with too much rain in Western Districts and insufficient over the Eastern half, coupled with persistent gales, induced a serious setback to production almost generally. This adverse effect was accentuated in March by exceptionally warm and dry conditions which curtailed pasture growth and delayed ploughing and the sowing of crops. In addition, gusty winds caused the bush fire menace to assume grave proportions, particularly in Southern and Eastern districts. Fairly good rains in April improved the position, and cooler temperatures and the absence of gales were favourable factors. In addition, the rain was mostly of a steady, soaking type which penetrated some distance and ensured the germination of seed and softening of the ground for ploughing. May and June, however, were marked by a predominance of under-average rainfall with many frosts, and, in consequence, crops became backward, pastures short, and stock showed a falling-off in condition. These effects persisted throughout July, except in Northern districts where satisfactory rains fell and a considerable agricultural and pastoral improvement resulted. Unfortunately, this improvement was not maintained during the following three months, and a dearth of rainfall, with rather frequent high winds and frost, adversely affected conditions generally. Evenly distributed rain throughout November resulted in an improvement in cereal crops in the North, but elsewhere growth was backward and light, particularly in the Midlands. Pastures and stock also continued to show the effects of the dry conditions. Most of the State reported over-average rainfall in December with some improvement in crops and pastures. A caterpillar pest in many districts, however, caused considerable damage and necessitated the early harvesting of hay, &c.

Pressure Variations.—As is usually the case during years of under-average rainfall, atmospheric pressure throughout the year was mostly above average. The only months showing a mean deficiency were January, February, and November. The amount below normal was pronounced in February (0·2 inch), owing to the fact that only two "Highs," of moderate intensity, were associated with Tasmania during that month. On the other hand, well developed anticyclones were a persistent feature from March to October, particularly during the Spring. The highest reading of the barometer attained at Hobart was 30·551 inches on 7th May, and the lowest 28·697 inches on 22nd February.

Monthly Weather Summaries.—Rainfall for JANUARY was slightly above normal in all divisions except the South-Eastern. The month, on the whole, was a cool one, although some readings above 90 degrees were recorded during the first week. A predominance of high atmospheric pressure was manifest during the first half of the month with mostly fine weather, whilst from the 19th until practically the close a persistent series of deep waves of low pressure passed across the Island accompanied by unsettled and disturbed conditions and rather frequent showers.

FEBRUARY was a wet month over the South-Western half, particularly on the Western highlands and in parts of the Huon district, where it was the wettest February on record. The remainder of the State, however, only received from one-third to two-thirds of the average rainfall. Except for a brief fine spell from the 11th-15th, persistent showers fell throughout the month in the Western Division, but elsewhere the first three weeks were mostly fine and dry. From the 21st, however, showers fell over the whole of the Island almost every day.

Temperatures were exceptionally cool for the time of the year. Except in the Eastern Division, where average conditions prevailed, mean maxima ranged from 3 to over 7 degrees below normal, whilst mean minima were from 2½ to nearly 6 degrees below throughout the State. The mean maximum temperature was the lowest on record for February at Stanley, Zeehan, Miena, and Moina, and a similar mean minimum record was established at Hobart, St. Helens, and Moina. Extreme temperatures covered a wide range during the month. A minor heat wave was experienced on the 14th and 15th, when temperatures rose close to the century mark (Swansea, 98; St. Helens, 97; Hobart 94; and Launceston, 92 degrees), accompanied by an outbreak of bush fires. In direct contrast to this, snow fell on the Western, Central, and Southern highlands on several occasions, Mt. Wellington having five separate deposits, which is a record for February.

Gale force was attained at Hobart on a record number of 20 days, with 11 consecutive occurrences between the 18th and 28th.

MARCH was dry and warm. Rainfall was from 20 per cent to 60 per cent below the average in all districts except parts of the S.E. quarter. where slight excesses occurred. Mean temperatures were exceptionally high, ranging from 2 to over 3 degrees above the normal. Mean maximum tem-

peratures were the highest on record for March at Hobart, Moina, Swansea, and St. Helens. The last-mentioned station, with a reading of 102 degrees on the 11th, registered its highest temperature on record for any month, and several places (including Swansea, 100 degrees; Hobart, 99·1 degrees; and Oatlands, 95 degrees) attained the highest March reading on record. These conditions, in conjunction with gusty winds and an absence of rain, caused the bush fire menace to assume grave proportions, particularly on the 13th, when very severe fires developed in Southern and Eastern districts.

Slowly moving anticyclones showed a tendency to linger over the Tasman Sea, especially during the first fortnight, producing conditions favourable for a heat wave over the South-Eastern States. Most of March's rain was recorded in connection with depressions on the 2nd and 20th, the latter disturbance which possessed cyclonic characteristics being the only well developed "Low" of the month. Many thunderstorms were reported on the 19th.

APRIL also was very dry, the only exceptions being slight excesses in the North-Eastern quarter. Mean temperatures were mostly from 1 to 2 degrees below the average. Frosts were very prevalent on the 26th, and a light fall of snow occurred on the Central Plateau. Most of the depressions during this month were of cyclonic type with a marked effect on the rainfall distribution. The prevailing wind was N.E. to S.E. during the approach and passage of these cyclones instead of the familiar N.W. to S.W. circulation of Southern Ocean "V" depressions, with the result that the exposed Eastern half of the State more nearly approached the average rainfall figures than the Western half.

A feature of the weather during the first week was the rapid movement of pressure systems, but thereafter the rate of progress was below the average. Whereas the "Highs" were usually intense, the opposing "Lows" were rather shallow, so that pressure gradients were not steep and gales were, in consequence, notably absent. Most of the rain fell during the second week and on the 25th.

The prevailing dry conditions continued throughout MAY with mean temperatures fluctuating slightly about the average. Mean pressure was above normal from a succession of intense anticyclones, but several well developed depressions traversed the State—that of the 16th-17th producing the most widespread rain of the month. Features of the weather were an absence of gales and the prevalence of foggy conditions during the first half.

JUNE was a wet month in the Western Division, but elsewhere aggregates were well below average, especially in Eastern, Central, and Southern districts. It was the driest June on record at Colebrook and Cullenswood. Day temperatures were close to normal, but nights were mostly cold with many frosts, particularly in the East, North, and Central Plateau.

The daily isobaric charts for June disclosed that a series of intense and slow-moving anticyclones were associated with Tasmania for more than two-thirds of the period—separated on the first and last days and during the periods 5th-7th, 14th-16th, and 20th-21st by depressions of the orthodox Southern Ocean type having a predominating wind circulation of N.W. to W. and S.W. Most of the month's rain occurred during the passage of these depressions and the fact that the distribution greatly favoured the Western, North-Western, Central Plateau, and extreme Southern Divisions may be directly attributed to the above-mentioned direction of the prevailing winds.

Although comparatively quiet wind and sea conditions prevailed for the most part, disturbed weather with gales and rough seas occurred generally on the 1st-2nd and off the South and West Coasts on the 7th-8th and 21st. Other features of the month were the prevalence of fog on the 4th and 19th, and thunderstorms on the 28th and 30th.

During JULY the Northern and Western Divisions received over-average rainfall, Central areas showed little departure from normal, and the remainder of the State a deficiency. Most of the month's rain fell in connection with Southern Ocean depressions on the 8th-10th, 24th and 28th-29th. A striking characteristic of these depressions was that, whereas the various Warm Fronts with attendant N. to N.W. winds in advance of the trough were invariably accompanied by good rains over the exposed Northern and Western districts, the S.W. to S. Cold Fronts, which comprised the rearmost portion of the disturbances, failed as a rain-producing agency to Southern Tasmania in all cases excepting the 1st and 13th. Hence the contrasting excessively wet and comparatively dry areas.

The most unsettled period of July was during the last ten days, when a succession of "Lows" and "Highs" passed across the State. These systems were all of intense development, and the steep pressure gradients set up resulted in fresh to very strong N.W. to W. winds with rough seas off the exposed coasts. Conditions were particularly severe over the Northern half on the 28th-29th, when very heavy rain caused moderate flooding in rivers and much low-lying country was inundated. This was followed early the next day by a fierce wind storm which caused severe structural and telephone line damage on the West Coast and minor destruction in Southern Tasmania.

AUGUST was very dry, deficiencies ranging from 40 per cent to over 70 per cent, except in Western Divisions, where the shortage was 20 per cent. It was the driest August on record at many places in the South-Eastern quarter, also in the vicinity of the Tamar Valley and at a few other places. Temperatures were extremely mild for August. Mean maximum temperatures were mostly from 1 to 2 degrees above the average, but varied from 2½ to nearly 4 degrees above at Hobart, Swansea, and Cape Bruny—constituting a record for the month.

Mean atmospheric pressure was about ·14 inch above normal. The dearth of rainfall for this month was largely due to a succession of intense anticyclones drifting across Australia, and a series of rapidly moving depressions of moderate intensity sweeping across the Southern Ocean from the Bight to the Tasman Sea with the normal absence at this time of the year of depressions penetrating from Northern Australia and introducing a flow of warm, moist air from the Tropics. The charts were mainly of the typical "dry weather" type, having isobars lying in an East-West direction.

SEPTEMBER rainfall was below the average, except in parts of the South-Eastern Division. The Northern Division received about one-third, the Midlands two-thirds, and the Eastern and Western Divisions about three-quarters of the normal fall. The shortage was less pronounced in the Derwent Valley and Central Plateau, ranging from 15 per cent to 20 per cent.

Although mean temperatures were slightly above the average, snow fell on the highlands on seven days, the heaviest deposits occurring with a cold wave on the 2nd when the visitation extended to low-lying hills, and for a short period to Hobart and environs.

Whilst anticyclones were generally extensive and well developed, only three of the seven depressions which affected Tasmania induced a fall in barometer readings appreciably below the average. These were all of Southern Ocean origin, and passed across the State on the 7th-9th, 11th-13th, and on the 18th. The second disturbance brought useful precipitation to all districts, but the other two were disappointing in rain-production. During the last ten days, however, the outer boundaries of three "Lows" of tropical origin, and having cyclonic characteristics, extended to Tasmania from the Mainland. The value of the rain accruing from these depressions was considerably enhanced because of its soaking character.

The persistent dry weather continued throughout OCTOBER, all divisions reporting under-average rainfall. The Derwent Valley had a shortage of only about 8 per cent, but in the East and Midlands the deficiency was over 80 per cent, and elsewhere between 30 and 50 per cent. It was the driest October on record at many stations in the Midlands and East and at a few places in the North.

Mean day temperatures were from 1 to 2 degrees above the average, and nights were from 1 to 2 degrees below. A minor heat wave was experienced on the 11th-12th with readings of 80 to 90 degrees, Hobart, with 89 degrees on the 12th, recording the highest October reading for 18 years. In contrast to this, snow fell on the highlands on the 16th-17th, 24th, and 27-28th. On the 27th snow fell at sea level in the South, the first time during October for 17 years. An absence of cloud at night favoured radiation and damaging frosts were prevalent.

A persistent feature influencing Tasmania's weather was the passage of a cyclonic "Low" through Bass Strait accompanied by a Southern Ocean depression having its trough well to the South of the Island. This happened on four occasions—8th-9th, 13th-14th, 20th-21st, and 31st. These disturbances were mostly shallow and ill-developed, but exceptions were on the 15th, 26th-27th, and 31st when barometers fell considerably below the normal. Except for a light general rain recorded on the 8th-9th, fine weather prevailed during the first fortnight. Then followed a period of unsettled wintry conditions until the 18th with N.W. to W. gales, rain in the West, and showers elsewhere except in the East and Midlands. Settled weather was then re-established until the 23rd, when a long period of cold, squally W. to S.W. weather with showers was ushered in and continued until the close of the month.

Except in the West, where a slight excess was reported, and in the Derwent Valley, where average conditions prevailed, the rainfall for NOVEMBER was below normal. Deficiencies ranged from 10 per cent in the North to 50 per cent in the Midlands. Flinders Is., through the agency of a cyclonic depression on the 22nd-23rd which yielded torrential rain (6 to 7 inches in 24 hours) registered the highest falls on record for November (Emita 904 points, or 416 per cent above the average). Mean day temperatures were from 1 to 3 degrees below the average, and nights were also from 1 to 2 degrees below. Another feature of the month was the prevalence of high winds—gale force being attained at Hobart on 17 days.

DECEMBER was, on the whole, one of the wettest months of a very dry year. Except in the West and Midlands, where average conditions prevailed, mean district excesses ranged from 12 per cent to 20 per cent in the North and South-East, and from 25 per cent to 35 per cent elsewhere. At Hobart this was the only month of 1940 in which the rainfall exceeded the average. A common feature of isobaric charts this month was the coalescing of a Southern depression in the vicinity of Tasmania with the fringe of a tropical "Low" operating over New South Wales and Victoria. The introduction of a flow of warm, moist air from the tropics produced conditions favourable for rain, and several very beneficial general falls were received, notably on the 2nd-3rd, 6th-8th, 19th-20th, and 30th-31st. Other features of the month's weather were the rapid Easterly movement of pressure systems during the latter half of the month; thunderstorms on the 5th and 13th-15th; and moderate displays of the Aurora Australis between the 20th and 23rd.

The following is a summary of the Hobart monthly temperature and rainfall for the year 1940:—

Month.	Mean Temperature.	Normal Temperature.	Rainfall (Inches).	Normal Rainfall (Inches).
January	60·1	61·7	1·43	1·84
February	58·9	62·2	1·46	1·53
March	62·1	59·4	1·24	1·76
April	53·7	55·2	0·72	1·96
May	49·9	50·7	1·47	1·83
June	48·1	46·9	0·80	2·25
July	46·3	45·9	0·93	2·15
August	50·0	48·1	0·84	1·84
September	56·1	51·0	1·80	2·07
October	54·2	54·1	1·76	2·32
November	54·8	57·1	1·78	2·44
December	60·7	60·1	2·94	2·09
Year	54·6	54·4	17·17	24·08

The highest maximum temperature was 99·1 degrees on 13th March, 1940, and the lowest minimum 32·1 degrees on 4th September, 1940. The highest maximum temperature on record is 105·2 degrees on 30th December, 1897, and the lowest minimum is 27·0 degrees on 18th July, 1866.

H. H. Pimblett, Government Printer, Tasmania.

TASMANIAN TRADE.

Twelve Months ended 30th June, 1940.

(Figures in parentheses are those for the corresponding period of 1938-39.)

The figures shown in the following tables represent the values of the trade of Tasmania as compiled from documents presented by the importers and exporters respectively.

The recorded trade of Tasmania for the year 1939-40, of £25,065,600, was the highest on record.

Imports at £12,162,380 (£11,215,500) increased by £946,880, or 8·4 per cent, on the figure for 1938-39. Interstate imports, valued at £10,890,250 (£10,082,400), were responsible for 89·5 (89·8) per cent of the total, while oversea imports accounted for 10·5 (10·2) per cent of the total.

Exports were valued at £12,903,230 (£12,233,100), an increase of £670,130, or 5·5 per cent. An increase of £1,641,770, or 18·6 per cent was recorded in interstate exports, while oversea exports accounted for a decrease of £971,695, or 28·6 per cent.

Owing to the rate of foreign exchange operating throughout the year, it is necessary to moderate the values of either imports or exports before the figures are properly comparable. During the year the Australian rate of exchange on London remained at 25¼ per cent, and oversea imports valued at £1,272,100 must, therefore, be increased to £1,593,350 to indicate a value in exchange against exports.

Compared with the average of the previous five years, the total trade increased by £4,707,000, or 22·8 per cent, imports rising by £2,075,600, or 19·9 per cent, and exports by £2,631,400, or 25·6 per cent.

THE TRADE POSITION.

The following table shows clearly the "visible balance of trade" for the last ten years:—

	Total Trade. £1000	Imports (*b*). £1000.	Exports. £1000.	Excess of Exports. £1000.	Excess of Imports. £1000.	Imports as a Percentage of Exports.
1930-31	14,328	7344 (*a*)	6984	....	360	105·2
1931-32	13,726	6683 (*a*)	7043	360	....	94·9
1932-33	13,623	6937 (*a*)	6686	....	251	103·8
1933-34	15,097	7587 (*a*)	7510	....	77	101·0
1934-35	16,229	8148 (*a*)	8081	....	67	100·8
1935-36	19,125	9816 (*a*)	9309	....	507	105·4
1936-37	21,320	10,722 (*a*)	10,598	....	124	101·2
1937-38	22,992	11,855 (*a*)	11,137	....	718	106·4
1938-39	23,734	11,501 (*a*)	12,233	732	....	94·0
1939-40	25,386	12,483	12,903	420	....	97·0

(*a*) Values calculated for the purpose of this table. The recorded values were:—1930-31, £7,230,000; 1931-32, £6,534,000; 1932-33, £6,796,000; 1933-34, £7,427,900; 1934-35, £7,963,600; 1935-36, £9,564,100; 1936-37, £10,461,500; 1937-38, £11,466,700; 1938-39, £11,215,500; and 1939-40, £12,162,400.

(*b*) The recorded figures for oversea imports include an allowance for freight and other charges. This is not so for interstate imports. It is estimated, however, that the freight on the latter approximates £400,000 per annum.

The figures submitted above are those arising from the visible interchange of commodities to which definite values can be given. In Tasmania, a more than ordinary amount of the activity of the community is devoted to providing for mainland tourists, a service which has the same effect on the trade balance as an export of goods, though no entry appears in the trade statistics on its account. On the other hand, there are services, such as shipping [see note (*b*) above], banking, insurance, &c., which enter into the equation, but which cannot be valued with even a reasonable degree of accuracy.

Subject to these limitations, 1930-31, with gold exports amounting to £120,000, imports were greater by £360,000 after adjusting the values of overseas imports, while for the year 1931-32 a favourable balance of £360,000 was recorded without the assistance of any accumulated gold in the State's exports. For six years the balance again

swung in favour of imports to the extent of £251,000 in 1932-33; £77,000 in 1933-34; £67,000 in 1934-35; £507,000 in 1935-36; £124,000 in 1936-37; and £718,000 in 1937-38. In 1938-39, however, the balance was again in favour of exports to the extent of £731,600, and again in 1939-40 to the extent of £420,000.

The increased trade of the State was shared by all ports except Devonport, Smithton, and Ulverstone. The value of trade at Hobart, including its sub-ports on the Huon River and elsewhere, which accounted for nearly half of the total trade of Tasmania, increased from £10,677,800 to £11,173,800, a rise of £496,700, or 4·6 per cent. Trade at Launceston increased from £7,021,100 to £7,591,400, a gain of £570,300, or 8·1 per cent. Contributions to the total trade of Tasmania made by the various ports during the last two years, expressed as percentages, were as follows:—Hobart, 44·6 (45·5) per cent; Launceston, 30·3 (29·9) per cent; Burnie, 10·9 (9·9) per cent; Devonport, 5·7 (6·4) per cent; Strahan, 4·6 (4·1) per cent; Stanley, 1·5 (1·5) per cent; Ulverstone, 0·9 (1·0) per cent; Smithton, 0·5 (0·7) per cent; and King Island, 1·0 (1·0) per cent.

The figures shown in the following tables include goods transferred to the mainland ports for transhipment to oversea countries, and similarly, interstate imports include goods from oversea countries received through the mainland States.

CHARACTER OF TRADE.

IMPORTS.

(Recorded Values.)

The principal classes of goods imported during the year were:—Metals, metal manufacturers and machinery, £3,162,500 (£3,255,500); food and drink (except alcoholic liquors), £2,254,200 (£1,984,100); drapery, clothing, and textiles, £1,996,200 (£1,771,400); stones and minerals, £475,200 (£466,000); tobacco, £473,400 (£478,500); oils, fats, and waxes, £521,100 (£401,100); paper and stationery, £470,900 (£371,500); drugs, chemicals, and fertilizers, £453,600 (£405,500); animal substances, £363,300 (£282,000); Spirituous and alcoholic liquors, £349,400 (£258,200); and earthenware, cement, china, glass, and stoneware, £240,200 (£204,800).

The following items were mainly responsible for the increase in the figures for 1939-40 on those of 1938-39:—Food and drink (except alcoholic liquors), £270,100; other drapery, clothing, and textiles, £123,100; not elsewhere included, £101,800; paper and stationery, £99,400; spirituous and alcoholic liquors, £91,200; wool, £79,200; other oils, £72,700; tinned plates, £63,200; machinery, £62,000; other metal manufactures, £52,300; boots and shoes, £48,000; petrol, £42,000; bags and sacks, £35,000; and drugs and medicines, £25,700.

A small number of items showed decreases, mainly:—Motor-cars, £267,700; chassis and parts, £20,500, coke, £15,500; coal, £2900; bottles, £5500; and tobacco, £5100.

Eliminating tourist traffic, by deducting export figures, the value of motor-car imports increased by £38,200 on the figure for 1938-39.

The following table shows the expenditure on net imports in connection with the motor industry during the last three years:—

	1937-38.	1938-39.	1939-40.
	£	£	£
Net imports of complete cars	711,300	756,800	565,900
Motor-cycles, chassis, bodies, parts, &c.	201,100	192,600	140,100
Petrol	243,000	239,300	281,200
Tyres and tubes	96,600	89,500	98,100
	£1,252,000	£1,278,000	£1,085,300

Classes I. and II., food and drink (excluding alcoholic liquors), showed the largest increase with a rise of £270,100, mainly on account of merchants holding larger stocks. Class VIII., drapery, clothing, and textiles, increased by £224,800, largely on account of increased values of bags and sacks, £35,000; boots and shoes, £48,000; cordage and twine, £7200; and other drapery, clothing, and textiles, £123,100.

EXPORTS.

Exports increased from £12,233,100 in 1938-39 to £12,903,200 in 1939-40, an increase of £670,100, or 5·5 per cent.

The principal variations are set out hereunder:—

Increases:—Woollen manufactures, £415,300; copper, £139,700; jams and jellies, £85,000; zinc, £60,300; timber, £47,700; furred skins, £46,300; wool, £45,500; fruit pulped, £36,600; sheepskins, £32,200; silver-lead ore, £21,300; butter, £10,200; tin ore, £10,200; carbide, £11,200; and bacon and ham, £6800.

Decreases:—Fresh fruits, £393,800; potatoes, £195,400; motor-cars, £76,800; cattle, £74,200; cadmium, £21,200; oats, £19,900; hops, £28,900; sheep, £13,300; preserved fruit, £10,500; limestone, £8600; and cement, £6000.

The most notable increase in exports was shown in woollen manufactures, with a rise of £415,300, due mainly to increased buying on the mainland. Copper with a reduced tonnage of 864 tons and increased value of £139,700, showed a substantial increase in value due to a rise in price early in 1939-40. Butter increased in quantity by 3000 cwts. and value by £10,200; pulped fruits also increased in quantity and value by 1,877,400 lbs. and £36,600; jams and jellies increased by 3,322,000 lbs. for £85,000. Timber again showed a satisfactory rise of 6,117,200 super feet for £47,700.

The exports of food and foodstuffs taken as a class, decreased by £476,383 from £4,466,200, representing 35 per cent of the total exports for the year. Fresh fruits and potatoes were the main items affected.

H. J. EXLEY,
Deputy Commonwealth Statistician.

Commonwealth Bureau of Census and Statistics,
Tasmania Branch, Hobart.
31st March, 1941.

IMPORTS AND EXPORTS, YEARS 1917-18 TO 1939-40.

NOTE.—The figures for the years 1917-18 to 1921-22 represent Direct Oversea Trade only, because no records of Interstate Trade or Oversea Trade shipped from or to Mainland Ports were made during these years.

† NOTE.—The figures given for each port in the last three tables above no *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 35.

AGRICULTURE AND LIVESTOCK

CROPS in 1939-40.

The area under crop in 1939-40 was 258,038 acres, an increase of 14,990 acres, or 6·1 per cent on the previous year, and about 6317 acres or 2·4 per cent below the average for the past decennium.

The season was fair to good, and the yields were lower than those recorded for the previous year. The early part of the season was extremely dry, but later good rains improved the condition of crops.

WHEAT.

The area sown to wheat decreased by 2350 acres, from 9850 acres in 1938-39 to 7500 acres in 1939-40, which was about 9700 acres lower than the average of the last decade. The yield per acre was 14·41 bushels, and production 107,720 bushels, compared with 205,260 bushels threshed in 1938-39, and 377,260 bushels, the average of the last ten seasons.

BARLEY.

The area sown to barley was 7720 acres, a decrease of 970 acres on last year's figure. Production amounted to 195,640 bushels, of which 181,770 bushels were English and 13,870 bushels of the Cape variety.

OATS AND HAY.

A decrease of 1720 acres was shown in the area sown to oats. Algerian increased by 170 acres, and white oats decreased by 1890 acres on the previous year's figures. Total production amounted to 529,410 bushles, compared with the yield of 644,960 bushels in 1938-39, and the decennial average of 830,680 bushels. The area sown to hay was 96,260 acres, an increase of 16,300 acres on the area sown last season. Production amounted to 141,400 tons, an increase of 31,870 tons on last year's output, and 21,580 tons more than the average for the past ten seasons.

PEAS.

The area of peas increased by 2050 acres, on the 1938-39 figure, to 17,160 acres in 1939-40. This represents a decrease of 5930 acres on the decennial average of 23,100 acres. Blue peas yielded 125,200 bushels, and grey 230,100 bushels. The total output, 355,300 bushels, was 102,740 bushels higher than last year's production, but 51,210 bushels lower than the average of the past decennium.

Production of green peas for canning, &c., amounted to 43,200 bushels from an area of 526 acres sown.

POTATOES.

The area planted under potatoes in 1939-40 was 30,450 acres, 3750 acres more than in 1938-39. Production amounted to 114,410 tons, compared with 89,330 tons last year, and 94,600 tons, the average of the past ten seasons.

HOPS.

An area of 909 acres of productive hops was recorded for 1939-40, a decrease of 12 acres on last year's area. The total output was 1,780,530 lb., compared with an output of 2,295,690 lb. in 1938-39, and 1,868,420 lb., the average for the past decennium. The yield per acre decreased from 2493 lb. in 1938-39 to 1958 lb. in 1939-40.

APPLES.

The area devoted to orchards decreased in 1939-40 by 510 acres to 31,070 acres, of which apple trees in bearing accounted for 21,870, or 70 per cent. Production of apples amounted to 5,148,000 bushels, representing a decrease of 576,000 bushels on the 1938-39 output, an increase of 556,200 bushels on the average for the past ten seasons. Of this total, 3.388,350 bushels were exported. Value at port of shipment was £903,500, compared with £1,540,755 realised for the previous year's oversea shipment.

Particulars of production and values during the last five years are as follows:—

1939-40.	Production Bushels.	Value at Port of Shipment.
		£
Exports	3,388,350	903,550
Used in factories and local consumption	592,300	58,125
Not used. Rebate paid 2/- per bushel	1,167,350	116,735
Total	5,148,000	1,078,410
1938-39	5,724,000	1,578,990
1937-38	4,792,000	1,198,000
1936-37	4,611,000	989,100 (*a*)
1935-36	3,950,000	857,400 (*a*)

(a) Includes bounty paid in Tasmania, £43,000 in 1935-36, and £28,500 in 1936-37.

LIVESTOCK (at 31st December, 1939.)

HORSES.

The number of horses decreased by 853 from 30,458 in 1938 to 29,605. The decennial average was 31,258.

CATTLE.

Cattle decreased by 9923 during the year, and the total now depastured is 252,484, compared with 262,407 in 1938, and the decennial average of 250,066.

SHEEP.

The number of sheep increased by 51,430 to 2,677,120, distributed as follows:—

	No.	
Ewes	1,145,303	43 per cent.
Lambs	700,868	26 per cent.
Other sheep	830,949	31 per cent.
Total	2,677,120	100 per cent.

PIGS.

The number of pigs was 44,941, compared with 45,317 in 1938.

VALUE OF RURAL PRODUCTION.

The net value of rural production in 1939-40 was £5,264,460, compared with £5,531,000 in 1938-39, a decrease of £266,540, or 4·8 per cent. Agricultural production, which was responsible for 45 per cent. of the total, decreased by £653,260, and poultry by £27,770. Pastoral production, however, showed an increase of £352,620, and dairying £60,930.

The net value of production at the farm during the last five years was as follows:—

	£
1935-36	3,991,020
1936-37	4,204,160
1937-38	4,993,420
1938-39	5,531,000
1939-40	5,264,460

Details of these values are shown on pages 7 and 8.

NOTE.—The percentage in the last column is designed to give an approximate measure of the proportion of farming and pastoral land, excluding Crown leases and licences, that is rented from the owner. Share farms are left out as being intermediate in their nature. The figure given is the percentage of rented land to the total made up of rented land, freehold occupation, and Crown land in process of purchase on time payment.

PRODUCTION: MANUFACTURING—TASMANIA.

YEAR 1939-40.

(Figures in parentheses are those for corresponding period of 1938-39.*)*

For statistical purposes in Australia a factory is an establishment engaged in secondary production, which uses power or employs more than three persons. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Australian schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

During the year 1939-40 returns were collected from 980 (944) factories, an increase of 36 compared with the preceding year.

HANDS EMPLOYED.

The number of workers employed in factories on an average for the year 1939-40, 14,670 (13,802), showed a considerable increase on the number in the previous year, and was the greatest number of workers yet recorded. The increase in workers during 1939-40 was not confined solely to males, there being an increase of 604 males and 264 females.

Some of the more important increases in total numbers of workers are shown in the following industries:—Newspapers, paper making, printing, &c., 1436 (1176); woollen, tweed, and knitting mills, 1731 (1585); sawmills, 1516 (1451); bread, biscuits and confectionery, 1335 (1258); and electrical apparatus, 65 (23).

The following table gives a classification of hands employed according to the size of the factory in which they work:—

PERCENTAGE OF WORKERS IN FACTORIES.

Classification of Factory.	Tasmania.					Australia.
	1921.	1936-37.	1937-38.	1938-39.	1939-40.	1938-39.
1- 20 workers	35	38	37	34	32	23
21- 50 workers	27	16	15	15	14	16
51-100 workers	15	7	7	8	11	14
101 and over	23	39	41	43	43	47
Totals	100	100	100	100	100	100

Although during the year 1939-40 the percentage of all workers in factories with over 100 hands remained unchanged at 43, the average number of hands in this class of factory increased to 474 (445), thus maintaining the steady upward trend of recent years.

The average number of workers for all factories in Tasmania during 1939-40 was 15·8, compared with 15·5 in 1938-39.

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods delivered from the factory, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light and water; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share of the value of production accruing to labour from its co-operation with capital. At present, also, no reduction is made for depreciation owing to the impossibility of obtaining completely accurate and consistent figures.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1935-36.	1936-37.	1937-38.	1938-39.	1939-40.
	£	£	£	£	£
Output	8,853,882	10,461,366	11,321,559	11,158,205	12,993,294
Raw material	3,629,962	4,641,471	4,854,787	4,613,978	5,410,648
All other costs (excluding wages and depreciation)	1,157,060	1,004,291	1,021,678	1,145,568	1,329,617
Net production	4,066,860	4,815,604	5,445,094	5,398,659	6,253,029
Labour cost	1,979,510	2,212,961	2,443,233	2,624,163	2,834,727
Unallotted balance	2,087,350	2,602,643	3,001,861	2,774,496	3,418,302
Labour cost per cent. of net production	% 48·7	% 46·0	% 44·9	% 48·6	% 45·3
Net production per £100 labour cost	£ 205	£ 218	£ 223	£ 206	£ 221

The gross output for 1939-40 amounted to £12,993,000 (£11,158,000), and net production to £6,253,000 (£5,399,000). After deducting labour costs from net production, an "unallotted balance" of £3,418,000 (£2,774,000) remained for distribution among overhead charges and profits, together with an allowance for depreciation. Net production, which gives the best indication of the activities of the factories of the State, had for a number of years been valued at about £3,600,000, but with the onset of the business depression the values declined in 1931-32 to approximately £2,808,000, but increased in subsequent years to £6,253,000 during the year under review. For each £100 expended in salaries and wages, the average value of net production was £205 in 1935-36; £218 in 1936-37; £223 in 1937-38; £206 in 1938-39; and £221 in 1939-40. The aggregate cost of raw materials rose considerably during 1939-40, and amounted to £5,411,000 (£4,614,000), representing 42 (41) per cent. of the total output.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production. 1935-36.	1936-37.	1937-38.	1938-39.	1939-40.	Net Production per £100 of Labour Cost. 1939-40.
	£	£	£	£	£	£
Lime, cement, &c. (a)	179,905	230,886	204,921	253,282	288,345	374
Sawmills	294,981	335,839	363,169	362,496	392,299	139
Metal extraction	839,880	1,292,117	1,540,271	1,163,179	(n)	(n)
Biscuits, confectionery, &c.	230,292	272,466	296,531	366,026	401,174	186
Jam-pulp, &c.	118,126	141,578	208,958	199,223	185,037	121
Woollen mills	465,191	375,254	362,202	416,609	650,738	247
Books, paper making, printing, &c.	308,158	323,052	388,065	450,250 (b)	619,000 (b)	208
Cycle and motor works	115,788	141,503	169,257	180,479	181,835	133
Heat, light and power (excluding carbide)	525,488	600,974	655,982	707,882	771,800	1,803

(a) Including Carbide. (b) Including Paper Making. (n) Not available for publication.

As may be seen from the table, the value of net production in 1939-40 was considerably greater than in the previous year in most of the above industries, but particularly in the woollen and books, printing, &c., classes, the latter being chiefly due to paper making.

LABOUR COSTS.

The total amount of wages and salaries for the year 1939-40 was £2,834,727, compared with £2,624,163 in 1938-39. The average payment to all workers, both male and female, for the year under review, was £193 (£190).

FIXED CAPITAL.

At the end of 1939-40 the value of fixed capital investments stood at £10,563,000, compared with £10,119,000 at the end of the previous year. Of this fixed capital, £3,775,000 (£3,717,000) was represented by land and buildings, and £6,788,000 (£6,402,000) by plant and machinery.

(*a*) Until 1923-24 only includes fuel. For detailed list of other charges included in 1924-25 and later years, see Tables Nos. 4 and 12.

(*b*) Available for Overhead Costs not included in foregoing, for Interest on Capital (including Working Capital), and for Profit; and until 1923-24 includes cost of wrappers, &c., repairs, and replacements, and other costs of manufacture.

(*c*) Net horsepower used; excludes electric power in order to avoid duplication.

(*d*) Until 1926-27 average number employed during periods in which establishments were in operation; since 1927-28 average for *whole* year.

Sales Tax (*d*)	(*f*) 256,000	(*f*) 290,000	(*f*) 218,000	220,000	(*f*) 304,000	(*f*) 401,000
Estimated Grand Total (*e*)	1,437,400	1,550,855	1,529,241	1,724,453	1,799,654	2,151,791

(*a*) Collections at the Central Office (which for the whole of Australia amount to approximately one-third of the total) are not included.
(*b*) Actual Collections in Tasmania. The amount of duty collected in other Australian States on goods transhipped to Tasmania not included.
(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for Australia that it did on the average for the nine years 1901 to 1909, for which years only full information is available. (The average per head, 1901 to 1909, in Tasmania was approximately 82 % of the average per head for Australia. Later years has been taken as approximately 80 %.
(*d*) Assuming similar proportion of Collections per capita as for Customs and Excise.
(*e*) Excluding Central Office Collections of Income, &c., Taxes.
(*f*) Including Flour Tax.

CONSOLIDATED REVENUE, 1934-35 TO 1939-40.

(*a*) Including Special Grants (Commonwealth) and Expenditure therefrom.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1940.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice existing prior to the year 1933-34 of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency prior to 1934-35, as shown above, to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1940.	£
Deficit as shown in above table	1,566,391
Losses on Returned Soldier Settlement	791,048
Loss on realisation of State Ships	61,260
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Other	34,959
Total	£2,584,003

NOTE.—The above sum excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

GOVERNMENT EXPENDITURE ON PUBLIC WORKS, 1939-40.

Purpose.	Public Works Department. (a)				Hydro-Electric Commission from Loans.	Total.

(a) Excluding deductions for children.
(b) Income from Dividends of Local Companies is not taxed in the hands of shareholders, hence "Taxable Income" here means the portion of Income upon which the Tax was directly demanded.
(c) Tax on Dividends of Local Companies is not included.

NOTE.—This table includes all assessments in respect of the income year ended 30/6/38 issued during the period 1/7/38 to 31/12/39.

(*a*) Including periodic payments in reduction of principal.
(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability as at 30/6/40.
(*c*) Charges in arrear, £222.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1939.

Hobart, 7th October, 1940.

SIR.

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year, 1939.

(Note.—Figures in parentheses refer to the previous year—1938.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, were supplied with copies of the printed report and tables for 1938, showing the strength, progress, and financial position of the societies.

The returns relating to the year 1939 were examined as customary for compliance or otherwise with the Friendly Societies Act and the registered rules of each society. The result was pleasing, inasmuch as fewer irregularities were disclosed than formerly in the conduct of financial transactions.

Societies.

At the end of the year 1939 there were 19 (19) distinct friendly societies, exclusive of two dispensaries in Tasmania. The special societies, which consist of members of one firm or institution or of residents of one locality, and have no branches, numbered 6 (6), with a benefit membership of 13·9 (12·0) per cent of all societies. There were 13 (13) general societies with 154 (156) branches for males, 26 (27) for females, and 7 (7) for juveniles. The decrease of 3 in the total number of branches operating resulted from amalgamations within the I.O.R., Southern Cross District (2) and the A.O.F., Tasmania District (1).

Membership.

The total membership at the end of the year 1939 was 24,626 (24,810), which comprised 22,859 (22,719) in adult male lodges, 1535 (1679) in adult female lodges, and 232 (412) juveniles, showing a decrease of 623 benefit members in general societies and an increase of 439 in special societies.

The number of initiations in general societies during 1939 showed a total increase of 72 for both sexes. These numbered 633 (566) in male lodges and 96 (91) in female lodges.

The average age of male members showed a considerable increase on the figure for the previous year.

The following table shows the increase of the average age of adult male members of general societies from the year 1925 to 1939:—

Year.	Average Age.	Year.	Average Age.	Year.	Average Age.
1925	39·6	1930	40·5	1935	42·8
1926	39·8	1931	41·6	1936	43·1
1927	40·1	1932	42·4	1937	43·0
1928	40·2	1933	42·5	1938	43·7
1929	40·3	1934	42·7	1939	44·2

The following table relating to male members of general societies, which form the most important section of the total membership, shows very clearly, in another manner, the drift into the older age-groups:—

Age Groups.	1920.		1930.		1939.		1939 Members Distributed on Basis of 1920.
	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.	
16-19 years	1605	7·79	1463	6·60	613	3·17	1508

Total Members whose Ages were specified	20,605	100·00	22,168	100·00	19,361	100·00	19,361

Sickness and Mortality.

Although the number of persons in adult male lodges who claimed sick pay during 1939 increased to 4770 (4519), the duration of sickness in days declined to 280,313 (286,218), while the average length of sickness per case decreased to 58·8 (63·3). In female lodges the cases of sickness decreased to 287 (297), and the days of sickness fell to 17,890 (18,449), the average length of sickness, per case, being 62·3 (62·1).

Details of sickness over the past six years are given in the following table:—

Year.	Cases of Sickness.	Total Duration.	Average Length of Sickness.	Sick Payments.	Sick Pay per Financial Member.
	No.	Days.	Days.	£	£ s. d.
1934.....	6114	369,758	60·5	35,439	1 11 1
1935.....	5823	358,124	61·5	33,898	1 9 0
1936.....	5301	354,407	66·9	33,264	1 7 11
1937.....	5158	335,394	65·0	32,837	1 7 1
1938.....	4816	304,667	63·3	28,531	1 4 2
1939.....	5057	298,203	59·0	29,641	1 5 4

During 1939 there were 315 (320) adult male deaths in friendly societies and 6 (17) female, making a total of 321 (337). The number of deaths of registered wives was 132 (137), the funeral payments relating thereto being £1805 (£1843).

Funds.

Exclusive of dispensary stock, valued at £4751 (£4386), accumulated funds by the end of 1939 amounted to £500,460 (£486,647), and the capital per financial member was £21 7s. 8d. (£20 12s. 2d.), and the rate of interest earned by the funds was 4·3 per cent. (4·3 per cent.).

Receipts.

Net revenue for 1939 was £124,477, the chief items being members' contributions and levies £88,391 (£89,147); interest, dividends, &c., £21,616 (£20,953); and miscellaneous items £14,292 (£9451).

Expenditure.

Of the net expenditure of £110,299 (£107,952), the greater part was distributed in payment of benefits for members, which totalled £83,378 (£82,393). These comprised £29,641 (£28,531) sick pay, £31,335 (£31,171) medical expenses, and £22,402 (£22,691) funeral donations. Of the remaining expenditure, £18,346 (£18,197) represented cost of administration, and £8575 (£7362) miscellaneous payments.

Further details under the several headings enumerated may be found on pp. 8 to 26.

Effect of War on Friendly Societies.

Although war was declared on 3rd September, 1939, no effects on Friendly Societies were visible during the remainder of the year.

In June 1940, at the request of the Societies, the Friendly Societies (War Service) Act was passed to assist Friendly Societies to pay death claims in respect of members dying on active service. The chief provisions of the Act were—

An account, called the Friendly Societies (War Service) Account, was opened in the Treasury into which the Societies pay a premium of 4 per cent. per annum on the death benefits of members who enlist for war service outside Australia. The premiums are paid from moneys raised by levy on members not on war service.

Societies may suspend or modify the liability to pay contributions to the Society and may suspend or modify the benefits in the Society of any member engaged on war service.

Death claims of such members who die on war service are paid by the Treasury from the above mentioned account.

War service is defined as service outside Australia during the present war in any of His Majesty's land, sea or air forces, and includes continuous service in Australia in the naval forces.

At the conclusion of the war, the credit balance, if any, in the account will be distributed among the Societies, but a debit balance will be met from Consolidated Revenue.

Up to the end of September 1940, 331 members were insured for a total death benefit of £20,329.

Conclusion.

Previous reports have stressed the necessity for fresh legislation to bring the Act up to date, and each year that passes adds to the difficulty of maintaining the friendly societies on a satisfactory financial basis.

H. J. EXLEY,
Government Statistician and Deputy
Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.
